

APPLICATION

This Line Output Power Transformer series has been developed to provide the required scanning amplitude and E.H.T. for the full range of 90° CTV's.

The external connections are made by 12 pins which are directly solderable to the PCB. With a very compact size it has been especially designed in layer technology for low cost 90° CTV.

The integrated focus potentiometer is internally grounded.

This series is designed in order to meet International Safety Standards.
