

APPLICATION

This Line Output Power Transformer series has been developed to provide the required scanning amplitude and EHT for 110° 4:3 and 16:9 Colour TV's Picture Tubes (with double focus) operating at line frequencies of 15625Hz (Standard) or 31250Hz (HDTV). Made in layer technology, it is suitable for high quality CTV's, home theater and multimedia applications.

The integrated double focus potentiometer is internally grounded. Available with or w/out bleeder resistor

This series is designed in order to meet International Safety Standards.
